

smart-me is looking for a

Software developer for C# and .net 60-100%

immediately or according to agreement in Rotkreuz

smart-me makes energy simple, cost-effective and suitable for the masses! We are a growing and innovative company from central Switzerland and active in the field of measuring, controlling and billing energy flows within a building.

All our devices have a direct connection to the smart-me cloud due to an integrated Wi-Fi interface and can be analyzed and controlled from there using a computer, tablet or smartphone. Energy data from electricity, water, heat and gas can be stored, managed and visualized in real time on a central platform on the internet. Numerous diagrams, reports and evaluations of the data make it possible to analyze measured values over different time periods, control them according to one's own needs and optimize consumption.

YOUR TASKS

- You are co-responsible for the development of our cloud environment and the corresponding apps
- You write server-side code for our cloud, the focus is on the parameters scalability and performance
- You develop web software (Asp.net)
- You work on new solutions in the field of renewable energies, especially in the field of energy management and e-mobility

YOUR BASIC QUALIFICATIONS

- You have a university education in the field of software development (FH/Uni/ETH)
- You have at least three years of work experience in software development with .NET and C#
